

## Popular local band Honeypot debuts their fourth CD and a new video at Café Bahia

Lead vocalist Chayo Tromp and his brother Alain entertained press and media members with the new mix of music to be found on their fourth CD “Beach Beach” on Wednesday evening at Café Bahia. Chayo feels this collection of new songs that was two years in the making, with songs recorded not only in Aruba, but also Holland, Santo Domingo and other places, to be their best yet. Accompanying the CD is a new video clip called “On Your Own” composed by Chayo, which brings a message of peace and love for all his Aruban brothers. He feels it is particularly appropriate for the coming holiday season, when good will for our fellow man should be particularly strong.

Chayo expressed that the new CD shows an improvement in the band as musicians and a maturity and progression of their music. He credits his constant exposure to new influences during his daily “Afternoon Chill” radio program on Cool FM has certainly helped to influence this evolution to what they are producing in their new CD.

Fans of Honeypot can find their new collection of songs at local CD shops, and they will be performing live at Café Bahia in Oranjestad this weekend for the club’s “Phobia” Halloween Bash. The band comes on at midnight until closing time, and partygoers are invited to come in the most outrageous costumes they can think of, those in costume will gain free entrance.

Congratulations to Honeypot on their fourth CD after ten years as a successful group performing in Aruba and Holland!
